

## About CeniARTH

CeniARTH is a single-family investment office and private foundation focused on funding market based solutions benefiting underserved communities.

Our mission is investing to improve livelihoods in deeply underserved communities globally. This has translated into sectoral interests in areas such as agriculture, energy access, and financial services. Our work has primarily focused on developing markets with investments in Africa, India and Latin America, though we maintain a global lens and are evaluating a select set of developed market investments that specifically address issues of rural poverty and inequality.

We work with a broad range of investment tools to achieve our mission, including both direct and fund investments. Our transactions range from fully commercial investments scaling mature solutions, to concessionary investments intended to support high impact, yet difficult or new markets or business models.

Our team of eight has been specifically assembled to serve this mission and consists of professionals with backgrounds in social entrepreneurship, social & institutional finance, development economics, public health, management consulting, and cross-border tax and legal expertise.

Illustrative investments to date can be found at [ceniARTHllc.com](http://ceniARTHllc.com)

## Investment Analyst Role

We are searching for an Investment Analyst to join our London investment team. This role will involve supporting our portfolio monitoring, investment research and strategy development. The role will primarily be responsible for engaging with our growing portfolio of investee organisations to monitor their business activities, gather data and produce analysis for executive review. The analyst will also complete market research to support our pipeline development, investment diligence and strategy development. Research and monitoring will primarily be focused on social impact-focused businesses and funds operating in developing economies.

**Location:** London, UK

**Pay:** Competitive; commensurate with experience

**Reporting:** This position reports to our Senior Investment Manager

### Responsibilities

#### Portfolio monitoring

- Maintaining relationships with portfolio organisations
- Gathering and evaluating financial and impact data
- Producing regular portfolio analysis for executive review
- Supporting ongoing development of our monitoring process

#### Investment team support

- Support pipeline development by speaking to potentially investible organisations

- Ad hoc market research projects to inform deal diligence and firm strategy development
- Long term potential to grow into financial analysis and leading transactions
- Support other ad hoc projects as part of a small, quickly evolving team

### **Profile**

- Top tier undergraduate education, 2:1 equivalent or higher
- 2 or more years work experience, including a finance or top tier consulting role for at least one year
- Direct experience in financial transactions involving private companies, for example through M&A, private equity, project finance, or commercial lending
- Exposure to business in developing economies
- Demonstrated interest in market based solutions benefiting underserved communities, especially in developing economies
- Eligible to work in the UK

### **Application**

Please submit a CV and brief cover letter to [jobs@ceniarthllc.com](mailto:jobs@ceniarthllc.com) with the subject line “Analyst Application – [your name]”. Applications will be considered on a rolling basis.
